

Partner of

Business

*Successful start at Euconsulting,
Orange Business Partner!*

CONTENTS

Euconsulting has 25 years of experience in providing telecom products tailored to entrepreneurs. First in partnership with Euphony, since 2014 as a preferred Orange Partner, with more than 2500 B2B customers.

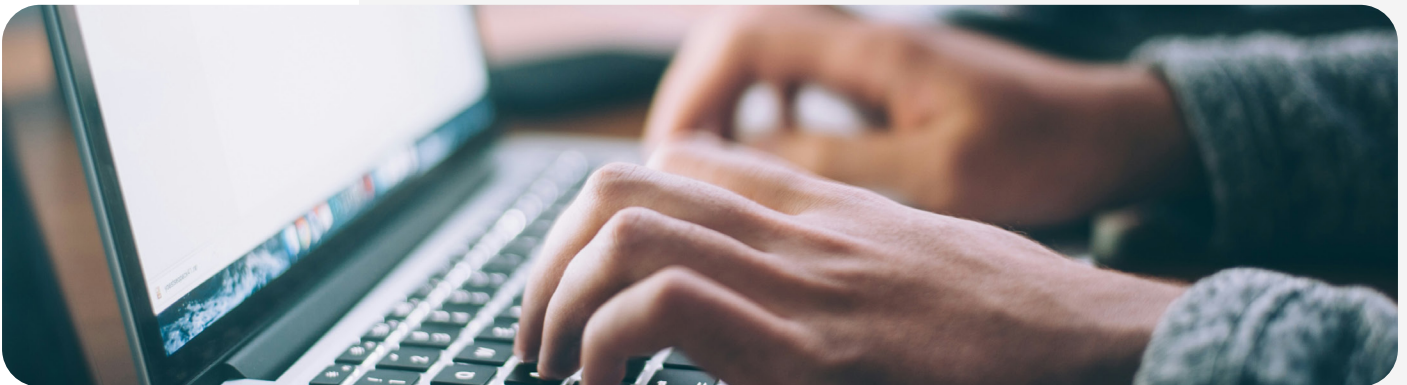

Our expertise and experience allow us to respond very flexibly to our clients' needs and proactively propose the best solution.

- 1 **TRANSFER NUMBER**
- 2 **YOUR SIM CARD**
- 3 **PREPARATION**
- 4 **THE ORANGE APP &
TRANSFER DATA APP**
- 5 **ORANGE CUSTOMER AREA**
- 6 **NO SURPRISES**
- 7 **NUMBER ON RELOADCARD**
- 8 **USE OF DOCUSIGN**
- 9 **CONTACT**

Transferring your number

- 1 In consultation with your fleet manager, **transfer date** for number was chosen.
- 2 A few minutes before the transfer, you **will receive a text message**.
- 3 Keep your **new Orange SIM card** within reach.
- 4 When you **no longer have a network signal** at your former operator, insert your new Orange SIM card into your smartphone.
- 5 It may take a few minutes to get activated on the Orange network ; **the activation** of your data connection may take a little longer.
- 6 When Orange's network signal appears on your cell phone, the transfer is complete. You are **reachable on the same number as before**.

Your SIM card

Your PIN and PUK codes are listed on the **back of your SIM card**.

Insert the SIM card into your cell phone and turn it on.

Enter your PIN.

Press OK.

How to change your PIN?

Form ****04*[old PIN]*[new PIN]*[again new PIN]#**.

For example: ****04*1234*4321*4321#**

How to change your PIN?

- Ⓢ key in the wrong PIN 3 times;
- Ⓢ Then enter your puk code;
- Ⓢ you can now choose a new PIN;
- Ⓢ If you are unable to log in with your pukcode you can always contact one of our staff members.
We are happy to help you!
- ☎ **0800-40282**

Preliminary steps

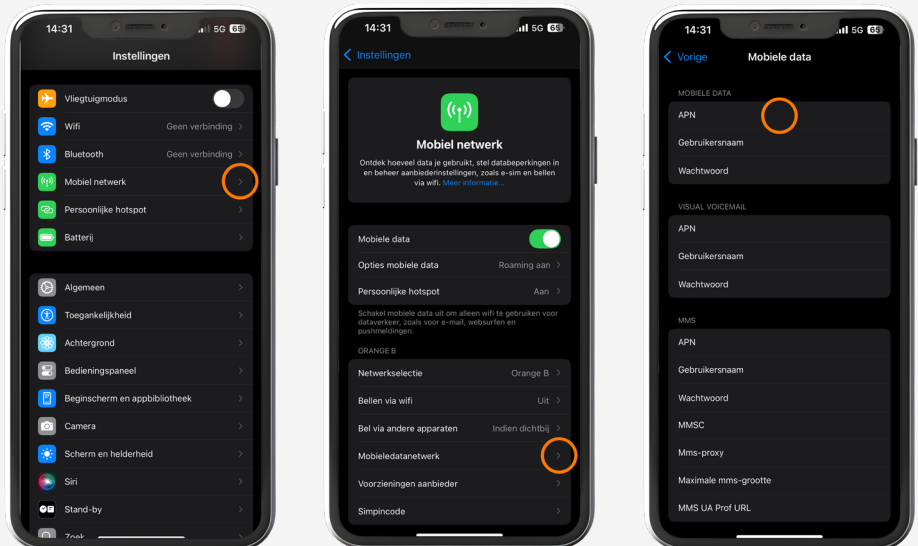

Mobile Data

To easily connect to the Internet you need to change the following settings on your device:

- iPhone: **iphone.mobistar**
- other brand: **internet.be**
- tablet: **iew.be**

You do not need a username, password or other data settings.

If you would like additional information about settings on other technical questions you can always go to the website business.orange.be/config for an explanation of how your smartphone to configure.

Voicemail

To configure and listen to your voicemail, you can call **5555**.

The Orange App

Free Mobile App:

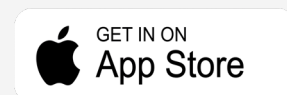

As an Orange customer, you get access to Orange's app.

Allows you to:

- find out how many remaining call minutes, text messages or surfing volume you have, both in Belgium and abroad;
- immediately see an overview of the costs for your company and for yourself (for Invoice Split users).

More info on My Orange: orange.be/myorange

Download My Orange from the App Store or Google Play Store.

The Data Transfer App

Transfer your data into this app when you switch from your old to your new smartphone.

Your data will remain on your old smartphone for backup purposes. You decide which data to copy or not.

Download Data Transfer via the **My Orange app**:

- Go to menu
- Then search 'other apps and services'
- You can download the app here

Your Orange customer zone

The **Customer Zone**, manage your own fleet efficiently
In one click you can

- optimally manage your subscription(s) and your Orange fleet
- view the details of your contracts
- analyze the consumption of your devices
- view your business invoices in detail and retrieve duplicates
- activate or deactivate your options yourself
- add or remove sim cards from your fleet
- buying a smartphone or having it repaired
- ... and a whole lot more!

Tip!

As a partner, we place great importance on after-sales service.
That's why we follow up after some time to ensure that everything
is still going smoothly.

Your Orange customer zone

Via the **Customer Zone**, you can activate various options to maintain control over your invoice:

1. MultiMedia Purchase Blocking

What it does:

Blocks purchases that are settled via the Orange invoice (e.g. De Lijn tickets, 4411 services, Apple purchases, etc.).

Useful for: users who want to avoid unexpected costs.

How to set up: Activate the 'Block multimedia purchases' option

2. National Data Control

What it does:

By default, Orange sends you an SMS alert when you have used 80% and 100% of your data bundle in Belgium. However, you have the option of automatically blocking data once your bundle has been used up via National Data Control.

Prevents: Out-of-bundle charges for additional data.

How to set up: Activate the 'National Data Control' option

3. Travel Data Control (Roaming Restriction)

What it does: Sets a limit for data usage abroad (even €0 to block roaming outside your bundle completely). Useful for: Anyone who wants to avoid roaming charges outside their bundle.

How to set up:

Set an allowed amount in the Travel Data Control option. _

With the handy **Orange App**, every user can check their data, call and text usage in real time via the app, and you, as the fleet manager, can keep track of everything via the **Customer Zone**.

No more unpleasant surprises

You can:

- monitor your usage with the My Orange app,
- be notified when you reach **80% and 100%** of your data bundle reached in Belgium and abroad,
- Be notified if you go **out of bundle** (e.g. premium text messages or multimedia purchases),
- Block text messages or calls to premium numbers via the customer service,
- Restrict **multimedia purchases** by setting a password select in your smartphone's settings,
- adjust your **Travel Data limit** in the My Orange app or in your Client Area.

The network

We continue to invest in the coverage and quality of our network In this way, to provide our customers with a unique experience.

1. With Voice over WiFi (VoWiFi), your calls are flawless, even at places where there is no mobile network.
2. With Voice over 4G (VoLTE), you make calls over the 4G network.

How?

you need a compatible smartphone and access to wifi/4G.
Adjust the settings on your smartphone to use via VoWiFi/ VoLTE surfing.

Do you sometimes have challenges?

business.orange.be/en/network/calls-over-wifi

Number on Prepaid

Have number put on reload card?

You still needs to register your number before the number can be used again.

Registration can be done through the website or at an Orange shop:

prepaidcust.orange.be/prepaid/customer/puiregistration

After activation, it is important to make an outgoing call first.

Orange will place €5 on the pace card so it does not have to reload.

Use of DocuSign

Orange Business uses DocuSign to conclude agreements — a digitally certified application for electronic signatures. This process is secure and complies with strict privacy regulations, including the General Data Protection Regulation (GDPR) in the EU.

Key points about digital signing at Orange:

Legal validity – Signing via DocuSign is legally binding in many countries, including Belgium and the Netherlands, thanks to the eIDAS regulation (EU).

Security & privacy – DocuSign meets high security standards (e.g. encryption, audit trails) to protect your data.

Convenience – You can sign agreements from any device, without a physical signature.

How does it work?

You will receive an email from Orange containing a link to the document to be signed in DocuSign. Open the document, review the content, and place your digital signature. Once signed, you'll receive a confirmation and a copy of the signed agreement.
